This is the first Office Action for the serial number 09/348,742, Banded Mount, filed on 7/6/99.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 5,098,051 to Aldridge et al.

Aldridge et al. discloses an aluminum (col. 7, line 5-7) stabilizer wire mount (53) for attaching the pole comprising a rectangular base plate (54, 55) having a top and bottom surface. The top surface having a boss (62) positioned in center and four raised ribs (56, 57, 58, 59) defining a channel (60). The boss comprises a loop (51). The bottom surface having a pair of depending serrated edges (see attachment of Aldridge et al., figure 15, a). Furthermore, Aldridge et al. teaches at least one band (2) seated in the channel and extending around the pole (see figure 17).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US Patent # 5,335,889 to Hopkins et al.

US Patent # 4,659,046 to Parduhn

US Patent # 4,325,529 to Seebinger
